

VITAM's vision of sustainable health democracy

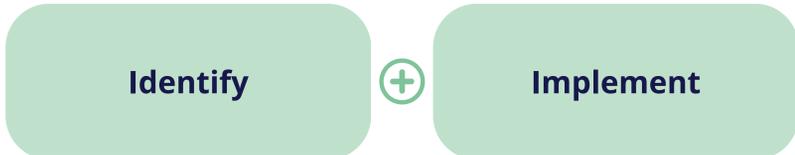

It's time for a paradigm shift in health care

How can we achieve this ?

➤ Primary health care research ➤

innovations that align with a sustainable health approach

Québec city, Canada

350+ researchers, graduate students, employees and citizen-partners

Disease prevention and treatment, health promotion, interprofessional collaboration, new health technologies, mental health, aging and seniors, social participation and inclusion, and more.

Research with and for the community

Citizens are at the **heart of VITAM's governance**.

30+ citizen-partners actively take part in committees, direction and research projects where their experiential knowledge is put forward.

VITAM is well aware of the important impact of **life conditions** and **social inequities** on health.

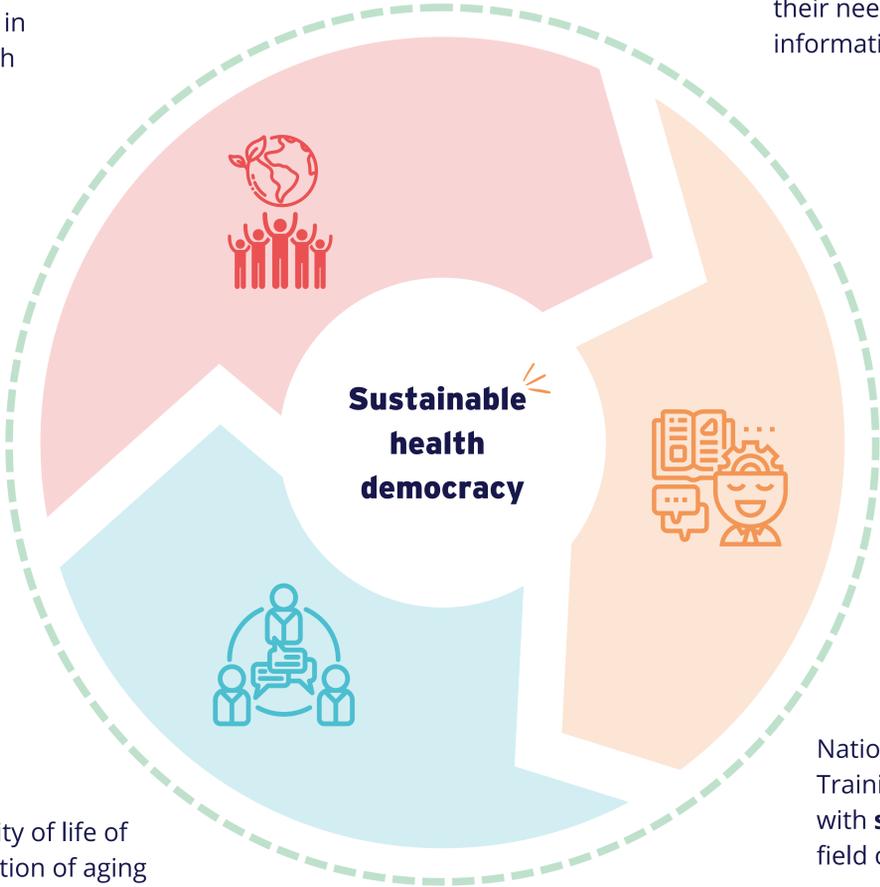

VITAM shares the first research chair in sustainable health **co-led by 2 citizen-partners** and will soon have its innovative citizen's table.

Intersectoral collaborations

VITAM can count on numerous partnerships, allowing **intersectoral research** on sustainable health:

- CIUSSS and clinical direction networks
- CISD Saguenay
- Innovation incubators such as:
 - VITA-Lab, which aims at enriching the quality of life of seniors by transforming the social imagination of aging
 - Living Lab Charlevoix, which navigates in a constant spirit of design thinking to improve the health of citizens in rural areas
- Nature Québec project
- Chaudière-Appalaches' sustainable health forum

VITAM is on a mission to promote and improve population health by building and leveraging knowledge through intersectoral and socially responsible research.

EDI

VITAM ensures constant efforts in promoting equity, diversity and inclusion in research.

Knowledge generation and mobilisation

VITAM has a strong focus on creating and adapting research results to its **various publics** to better address their needs, with the aim of mobilizing knowledge: from informative to decision-making support content.

VITAM's Dialogues seek to **democratize research** through the experiential knowledge of participants.

To this day, 14 grand public webinars generated discussion on various themes, including stigma in mental health, scientific communication and health care organization. These events welcomed

1800+ participants since 2020.

VITAM also has established relations with media and government stakeholders to help disseminate research results.

National initiatives like the SPOR National Training Entity provides community members with **skills, knowledge and training** in this field of research.

The **outreach** of VITAM is evergrowing !
